

Dear Hiring Team,

I am writing to express my interest in the Full Stack Developer Intern position at Bharat Academix. I am currently pursuing a B.Tech in Information Technology at Anurag University with a strong interest in full-stack and backend development.

I have worked on projects involving React.js, Node.js, Express.js, MongoDB, Java, and REST APIs. One of my key projects is a Code Collaboration Platform similar to GitHub, where I implemented authentication, role-based access control, pull requests, and backend APIs. I also developed a Java-based Banking Transaction Management System using JDBC and MySQL.

Through these projects, I gained experience in frontend development, backend architecture, database management, debugging, and API integration. I enjoy solving problems, learning new technologies, and collaborating on development projects.

I believe my technical skills, learning mindset, and enthusiasm for software development make me a strong candidate for this internship opportunity. I would be grateful for the opportunity to contribute and grow with Bharat Academix.

Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,
Sadiya Sadaf Shaik
