SUMMARY

Information Technology student with strong foundations in Java, Python, data structures, and full-stack development. Experienced in building backend systems, REST APIs, authentication workflows, and database-driven applications. Interested in software engineering roles focused on secure, scalable, and reliable systems.

EDUCATION

B.Tech in Information Technology, Anurag University **2023 – 2027**
CGPA: 8.61/10
Full Stack Development Certification, NxtWave **2024 – Present**

SKILLS

Languages	Java, Python, JavaScript, SQL
Core Concepts	Data Structures, OOP, DBMS, Operating Systems, REST APIs, Authentication
Frontend	React.js, HTML, CSS, Tailwind CSS
Backend	Node.js, Express.js
Databases	MySQL, MongoDB
Tools	Git, GitHub, Linux
Practices	Problem Solving, Debugging, API Development, Agile Basics

EXPERIENCE

Infosys Springboard Virtual Internship **Feb 2026 – Present**

- Built Python-based ETL workflows for cleaning, transforming, and organizing structured data.
- Worked on data processing pipelines to improve consistency and reduce manual preprocessing effort.
- Applied debugging and workflow-based problem solving to handle structured data efficiently.

PROJECTS

Banking Management System *React.js, Node.js, Express.js, MongoDB*

- Developed a secure banking web application with user authentication, account management, and transaction handling features.
- Built REST APIs for account operations with input validation and structured backend logic.
- Integrated database-driven workflows to support reliable user and transaction management.

Code Collaboration Platform (GitHub Clone) *React.js, Node.js, Express.js, MongoDB*

- Built a repository collaboration platform supporting pull requests, issue tracking, and role-based access control.
- Implemented backend APIs and application flows for managing repositories, users, and permissions.
- Designed scalable authorization logic to handle different user roles and collaboration workflows.

ATS Resume Analyzer *React.js, Node.js, Express.js, MongoDB*

- Developed a resume analysis tool that compares resumes with job descriptions and generates matching insights.
- Created APIs for parsing input data, calculating match scores, and generating recommendation outputs.
- Built an end-to-end workflow for resume evaluation using backend logic and structured data processing.

CERTIFICATIONS & ACHIEVEMENTS

Programming in Java – NPTEL
AWS Cloud Practitioner (SimuLearn)
Hackathon Participant – AE Project Expo, HackTech
Organizer – TechHack Event
